Projects

DevConnect – Remote Developer Collaboration Platform

- Built a web app using React, Node.js, Firebase, and Tailwind to help developers share code easily.
- Added AI-powered tools to generate use-case diagrams, ER diagrams, and other developer diagrams automatically.
- Ensured secure and efficient code sharing without losing formatting, making remote collaboration smoother.

EmergencyApp – Real-Time Emergency Response Platform

- Developed a mobile and web app using Flutter, Next.js, Tailwind, and Firebase to help users quickly request emergency assistance.
- Implemented real-time location sharing and emergency alerts for Fire, Medical, Police, and SOS situations, ensuring faster response times.
- Built an admin dashboard for responders to track, manage, and update emergency requests efficiently.

RuralCare AI – AI-Powered Healthcare Platform for Rural Areas

- Built a web and mobile app using Flutter, Flask, and Firebase to connect doctors and patients in remote regions.
- Enabled doctors to store patient records and receive AI-generated health recommendations.
- Allowed patients to view medical updates, prescriptions, and receive real-time alerts from doctors.
